

VACANCY

Senior Financial Analyst: 2 year Fixed term

Patterson Grade D2: D Lower

The office of the Head of the Programme is overall responsible for the conception of and driving the implementation of the strategy for the Namibia Green Hydrogen Programme. It acts as a conduit between the line Ministry, the Joint Implementation Committee/Green Hydrogen Committee and staff, to inform the achievement of the Programme's priorities. The Environmental Investment Fund of Namibia (EIF) on behalf of the Namibia Green Hydrogen Programme (NGH2P) invites application from suitably qualified and experienced Namibian nationals to apply for the position.

Main Responsibilities:

- Analyse the financing opportunities associated with new and emerging energy systems.
- Develop and analyse blended financing models
- Assist with analysis of financial models used by this unit, including robustness testing, ensuring their reliability and accuracy
- Co-create the Programme's Stakeholders' Map, including investors, public enterprises, MoF and financiers for GH2 Transactions and update on a regular basis as needed
- Co-create the material alongside international comparisons on Namibia's GH2 funding structure and return opportunities
- Report on progress relating to the Transactions unit for NGH2P regular reports, donor reporting, media updates, and other
- Support on any admin tasks related to the tender process, including virtual or physical sessions
- Help populate the monitoring, evaluation, and learning (MEL) module in the NGH2P programme management system (SoftXpert), relating to Transaction Unit matters
- Provide recommendations on the findings of emerging models in terms of their socio-economic impact
- Proactively create summaries of model results, offering best practice recommendations
- Participate and represent the NGH2P in stakeholder consultative meetings originating from Programme workstreams and external governmental or non-governmental sources
- Work on research pieces and media articles that are both educational and informative of ongoing activities in the GH2 financial space
- Utilise the Bloomberg and Bloomberg New Energy Finance platforms and use related tools to conduct cutting edge research of new and emerging energy systems
- Contribution to any RFQ creation and analysis/short list summaries
- Liaise with immediate partners and external stakeholders on an ongoing basis, be that in formal or more informal settings, assist with meeting set-ups and email dialogue

Qualifications:

Honours Degree Finance and Economics. **CFA** is a prerequisite. A master's degree in Finance or Economics is an added advantage. 5 years' relevant working experience in an analyst position covering a variety of financial tools & techniques for funding capital structures. 2 years' working experience in financial modelling and presentation skills. Demonstrated corporate finance and economics skills/interest.
