

SHORT COURSE ON OFFER

**Certificate in Development and Management of
Climate Change Projects**

(CREDITS 24 | NQF 9)

Course Length:	13 Weeks
Implementation Date:	September – December 2024
Delivery Mode:	Face-to-face
Registration Due Date:	31 August 2024
Investment:	N\$ 9000.00
Registration:	https://forms.office.com/r/Pn5cknmvUZ

Target Audience

Mid-level to senior professionals in any field involving Climate Change issues from the Private Sector, Non-Government Organizations and from Government Ministries, higher institutions, and other Organizations.

Criteria for Admission

Certificate or Diploma at NQF Level 8 (Honours degree) or If Level 7 (ordinary degree with a research project or relevant experience of 5 years minimum)

Purpose

The course provides participants with focused knowledge and skills in Project Management using general principles and applications as well as some specialized and practical knowledge in the field of climate change research. The course will further present an overview of Project conceptualization, formulating Climate Change rationale, Proposal development, and Proposal writing as well as Research Methods and Project Resource Mobilization in Climate change projects.

Exit Learning Outcomes

At the end of this short course, participants will be able to:

1. Describe the importance of Project Management.
2. Characterize and differentiate amongst different types of projects.
3. Propose and initiate a climate change project that requires complex strategy and planning (initiate, plan, and execute climate change projects)
4. Monitor and evaluate climate change projects.
5. Develop a charter for a Climate change project.
6. Assess and define project scope.
7. Apply known climate theories and principles to climate change research.
